PMS INTERNATIONAL GROUP PLC – WEEE complaince 2025/2026

The Waste Electrical and Electronic Equipment Regulations is regulated by the UK government. The UK WEEE Regulations were introduced in 2007 with the aim of promoting the separate collection, reuse and recycling of waste electrical equipment, which is one of the UK's fastest growing waste streams. PMS International Group Plc are an obligated producer under the WEEE regulations and as such finance the recovery and recycling of WEEE when it reaches end of life.

Producers are required to ensure all EEE products are marked accordingly with the "crossed out wheeled bin symbol" to remind consumers not to discard EEE in the domestic waste stream. PMS International Group Plc encourages all of its customers to make note of this symbol and avoid putting any EEE in your domestic waste bin(s) or container(s).

PMS International Group Plc supports the reuse and recycling of EEE as there are several environmental benefits of doing so, such as: Reduction of raw material and energy usage, prevention of landfill, prevention of hazardous and/or toxic materials present in some EEE contaminating the environment. As a Producer under the UK WEEE Regulations, PMS International Group Plc complies with its Producer Obligations by being registered as a Member of the Beyondly Compliance Scheme and has been assigned the following WEEE Producer Registration Number – WEE/AB0066TW – WEE/HC3342YR, certificates attached.

You can find out other places to recycle your electricals here https://www.recycleyourelectricals.org.uk/
